Flow Measurement Consultancy

User List - Training

Introduction

The following is a typical sample of users of the KELTON flow measurement training courses that have been in development over a number of years. The course prospectus includes both hydrocarbon liquids and gas together or individually. Courses have also been developed for individual customers.

1. EURONAV Ship Management SAS

KELTON conducted a two-day flow measurement training course for both Euronav and Maersk Oil Qatar technical staff onshore in Doha, Qatar. The content of the course was focussed on hydrocarbon liquid, proving and sampling.

2. RWE Generation UK plc

KELTON conducted a two-day flow measurement training course for engineers and technicians from Staythorpe Power Station, Newark on Trent, England, UK. The course was conducted on site.

3. QATAR Shell GTL Ltd

KELTON conducted two off, three-day flow measurement training courses for Qatar Shell at their gas-to-liquids (GTL) plant in Ras Laffan, Qatar. The content of the course focussed on hydrocarbon liquid & gas, proving and sampling.

4. Oman Oil Company Exploration & Production LLC (OOCEP)

As an extension to a flow measurement consultancy assignment KELTON further supported OOCEP by development of a five-day flow measurement training course for the instrument maintenance team. The course was conducted on the production site in Oman with four bespoke modules being presented based on procedures developed by KELTON.

5. Bahrain Petroleum Company BSC (BAPCO)

KELTON conducted a five-day flow measurement training course for BAPCO engineers and technicians (16 off) at their plant in Bahrain. The content of the course focussed on hydrocarbon liquid & gas, proving and sampling following the KELTON standard accredited course prospectus.

6. EQUATE Petrochemical Company

KELTON conducted two off, two-day flow measurement training courses for EQUATE engineers and technicians at their plant in Kuwait focusing on the technical requirements for the fiscal and custody transfer metering in use within EQUATE installations.

7. Public – Three-day Oil & Gas Course

KELTON periodically conduct three-day public flow measurement courses at various venues in the UK, Europe, Middle East and North Africa. Delegates attending the KELTON standard three-day course can request a CPD Certificate of Attendance and record their attendance towards the CPD requirements for their professional body, institute or employer. The full schedule is on the KELTON website.

About KELTON™

Fully accredited, KELTON™ is the leading independent measurement consultancy and software developer for the oil and gas industry. For well over two decades, KELTON has helped many international and national operators to ensure their full compliance with industry regulations. Whether clients require inspection, auditing or certification as part of System Compliance, uncertainty calculations for System Assurance or System Support – in KELTON they find a partner they can trust.

Services include:

- System Compliance
 - Inspection
 - Audit
 - Certification
- System Assurance
 - Design uncertainty
 - Modelling uncertainty
 - System uncertainty
- System Support
 - Manual/guidelines
 - Procedure generation
 - Educational
- Measurement Software
 - Desktop applications
 - Database applications
 - Pipeline applications

KELTON encompasses ISO/EN 9001 & 14001, BS/OHSAS 1800 and UKAS type 'C' Accreditation, is Microsoft Certified and is recognised as an Investor in People. Support is available from three strategic locations; UK, Qatar and Abu Dhabi.
